

FOR BAKERY OWNERS

How your bakery *uses KoBake.*

A simple day-by-day guide. Follow this and you'll see every loaf, catch every leak, and know your true profit — from anywhere.

One loaf, tracked from flour to cash.

Each person records their own part on their own login. KoBake connects it all — so if bread goes missing between two stages, it shows up immediately.

1

STORE KEEPER

Record the ingredients

Enter opening stock, new deliveries, and what was issued to production. KoBake warns you when flour is about to finish.

2

DOUGH MIXER

Record each batch

Planned vs actual loaves per batch. KoBake flags if you're falling short of plan.

3

BAKER

Loaves in and out of the oven

The most important handover. If loaves go in but fewer come out, KoBake catches it.

4

SLICER

Received, sliced, damaged

Every loaf accounted for. Gaps between oven and slicer are flagged as possible pilferage.

5

DESPATCH CLERK

What leaves the gate

Every loaf dispatched, to whom. Nothing leaves unrecorded.

6

CASHIER

Record the sales & cash

Walk-in, retail, distributor — auto-priced, with credit tracked separately.

The magic

Because every stage is recorded, KoBake can compare them. **200 loaves left the oven but only 180 reached the slicer?** That gap appears on the owner's dashboard the same day — with exactly where to look.

WHAT THE OWNER SEES

Your bakery, in your pocket.

Log in from anywhere — Lagos, Abuja, or abroad. This is your dashboard.

KoBake — Owner Dashboard

Today

Loaves produced	1,840
Cash in hand	₦742,000
Credit owed to you	₦128,500
Oven → slicer gap	32 loaves

⚡ Alerts — losses, pilferage & low stock

 32 loaves left the oven but never reached the slicer — possible pilferage, check that handover.

 **OUT OF STOCK:** Sugar — reorder now to avoid stopping production!

 **Running low:** Flour (4 left) — reorder soon.

 Everything else is running clean today.

 **Catch pilferage**

Bread that disappears between two stages is flagged the same day — with exactly where to look.

 **Never run out**

KoBake warns you before flour or sugar finishes, so production never stops.

KoBake · How your bakery uses KoBake

2

Know your true price. Collect your money.

These two features alone usually cover the subscription many times over.

🌾 Recipe Costing & Auto-Pricing

Flour price went up again? Enter the new cost once. KoBake instantly recalculates the **true cost of every loaf** and tells you the right price to sell — so you never sell at a loss without knowing.

Recipe — White Bread (Big)

True cost per loaf	₦712
Your selling price	₦900
Profit per loaf	₦188 (21%)

⚠️ Flour cost rose 8%. Suggested new price: **₦950** to keep your margin.

🚩 Debtors — collect what you're owed

Every bakery has distributors who owe money and get forgotten. KoBake keeps the list, flags who's overdue in red, and **writes the reminder for you** — one tap and it's ready to send on WhatsApp.

Debtors — Who Owes Me

₦128,500

Emeka Distributor ⚠️ 6 days overdue	₦45,000
Mama Ngozi Due today	₦38,500
Ibrahim Stores 4 days left	₦45,000

➡️ Tap **Remind** — KoBake writes the message and opens WhatsApp. You just press send.

GETTING STARTED

Your first week with KoBake.

Set up in a day. Follow this and you'll be catching leaks by the end of week one.

1

Create your staff logins

Owner → Staff & Labour → add each person (baker, cashier, storekeeper...) with their own login. Starter: 3 logins · Growth: 5 · Enterprise: unlimited.

2

Enter your recipes & ingredient costs

Once. This is what powers true-cost pricing and tells you the right price to sell.

3

Have each person record their part — every day

This is the habit that matters. KoBake only sees what gets entered. Ten minutes a day from each person is all it takes.

4

Check your dashboard every morning

Alerts show losses, pilferage and low stock. Act on the red ones first.

5

Add your debtors

Everyone who owes you. Then chase them — one tap sends the reminder.

Need help? We're here.

Stuck on anything? Message us on WhatsApp: **0901 819 8173**

Or raise a support ticket right inside the app — we'll get back to you.

LET'S GO 🚀

Stop losing bread *you can't see.*

Try KoBake free for 4 days. See it work with
your own bread before you pay one naira.
